User Experience Designer - triemers-ux.com

480 378 8703
Portland, OR, USA
triemers12@gmail.com

UX Designer with experience taking projects from initial research and ideation stages through implementation and development. I have extensive experience designing within various CMS platforms for both internal and external users. I am comfortable leading design workshops with CEOs and business leaders, designing functional and efficient user interfaces, and contributing directly to development efforts during design implementation.

I am a T-shaped designer—experienced and capable of contributing to and leading projects in all phases of the UX design process, with a particular strength in the solution space, especially when working within complex systems and constraints.

PROFESSIONAL EXPERIENCE

The Chronicle of Higher Education, UX Designer (August 2022 - Present)

- **Spearheaded the application of a branding overhaul** for digital products (e.g., Chronicle.com), eliminating technical debt and redesigning legacy and new components during a major theme and version update to the Content Management System.
- Designed the interface and user experience for The Chronicle's **AI research assistant** Ask Chron
- **Created and maintained a design system, style guide, and design QA documentation** using Figma, CSS, LESS, and Javascript to ensure consistency across digital products.
- **Conducted accessibility audits** and implemented plans to achieve AAA-level WCAG accessibility compliance across all products.
- **Conducted user research and interviews** with subscribers and customers to inform design iterations of premium tools, such as the Higher Ed Pay Tracker.
- **Lead design workshops** with leadership and key stakeholders to design a new header system for Chronicle.com, including content, functionality, and interactions, based on business and user needs.
- Collaborated closely with developers and stakeholders on designs for new pages, modules, and components across the digital product line.

Lost Canyon Imports, Founding UX Designer (February 2021 - June 2022)

- **Developed a company-wide design system** and application principles to ensure accessibility, cohesive visual identity, and reusability of components.
- **Conducted user research, competitive analysis, and market research** to inform business positioning and branding strategies.
- Designed and implemented a website following UX heuristics for information architecture and hierarchy.

EDUCATION

Maryland Institute College of Art, *M.P.S. in UX Design* (2022)

- **Conducted user research and usability testing** through surveys, interviews, and other methods.
- **Designed and executed original projects from concept to completion**, including e-commerce solutions and app designs.
- **Synthesized research data to create prototypes** and address challenges related to education, diversity, and accessibility.

Arizona State University, *B.A. Music Education* (2016)

- Specialized in curriculum design, technology integration, and community engagement in music education.

SKILLS & TOOLS
